REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art of record because the prior art does not teach or suggest a composition to be used in a process for electroplating surfaces with tin, said composition comprising the components as presently claimed, esp., a nitrogen-bearing block copolymer of propylene oxide and ethylene oxide, said copolymer having a molecular weight of 3950 to 6450.

Claims 3-8 are allowable over the prior art of record because the prior art does not teach or suggest a method for electroplating a surface in form of a steel strip or plate, the method comprising electrolytically coating the surface in the presence of the composition according to claim 1.

The prior art does not contain any language that teaches or suggests the above. *RU 2,103,418* teaches Proxamine 385 which has a molecular weight of 7600; and Applicants have shown unexpected results over the prior art (specification, pages 6-8, Examples 1-3). Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a *prima facie* case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDNA WONG whose telephone number is (571) 272-1349. The examiner can normally be reached on Mon-Fri 7:30 am to 4:00 pm.
